

*This Vol. contains some of the mineralogical and geological works finished in the year 1892 and 1893 at the Geological Institution of the University of Upsala. It is the intention to publish a yearly number, two or more numbers to be united into a volume of convenient size. Only papers worked out at the Geological Institution or based on materials belonging to the collections of the museum will be accepted.*

*All subjects are to be treated in French, German or English.*

*As an appendix the meetings of the geological section of the Upsala Student's Association of Science will be reported. The Bulletin will be sent free of charge to all geological institutions, museums, surveys etc. forwarding their own publications in exchange, as also to private persons, who send their published works regularly to the museum.*
