

The Students Association of Natural Science. Upsala.

Geological Division.

Meeting December 15th 1926.

10 persons present.

Mr. G. PEHRMAN gave a lecture on the titanium iron-ore deposits of Attu in Åboland. (See Meddelanden från Åbo Akademis Geol.-Mineralogiska Inst., N:o 6, 1927.)

Mr. E. LJUNGNER gave an account of the norite and anorthosite rocks of Brattön in Bohuslän. (See this volume.)

Meeting January 27th 1927.

23 persons present.

The following officers were appointed:

B. ASKLUND, Secretary.

D. MALMQUIST, Treasurer.

D. MALMQUIST and T. KROKSTRÖM, Reviewers.

Doc. B. ASKLUND read a paper on new observations made in the district of the Gävle sandstone.

Prof. C. WIMAN spoke of the work of American palæontologists in East Asia.

Meeting February 10th 1927.

10 persons present.

Dr. N. MAGNUSSON delivered a lecture on skarn types and metamorphic processes in Filipstads Bergslag.

Mr. E. WIMAN demonstrated a series of stuffs from the mines within the geological map-sheet »Engelsberg».

Meeting February 24th 1927.

17 persons present.

Prof. R. SERNANDER spoke of our uses and the question of gravel extraction from them.

Mr. D. MALMQUIST reviewed: H. Harassowitz, Laterit, Material und Versuch erdgeschichtlicher Auswertung. (Berlin 1926).

Meeting March 10th 1927.

18 persons present.

Prof. A. G. HÖGBOM gave a lecture on types of the geological and geographical conditions of Norrland.

Dr. C. SAMUELSSON read a paper on wind-drift and block-transport over sea.

Meeting April 21th 1927.

22 persons present.

Prof. E. STENSIÖ gave a lecture on Cephalaspides from Old Red of Spitzbergen. (See Skrifter om Svalbard etc., N:o 12, Oslo 1927.)

Mr. E. WIMAN gave an account of the intrusion-conditions of the Serarchæan granites.

Meeting September 29th 1927.

13 persons present.

The following officers were appointed:

D. MALMQUIST, Secretary.

P. THORSLUND, Treasurer.

B. ASKLUND and P. THORSLUND, Reviewers.

Dr. ASTRID CLEVE read a paper on the Litorina-sea.

Meeting October 20th 1927.

11 persons present.

Prof. H. BACKLUND showed »Les reserves mondiales en pyrites», a work published by the geological congress in Madrid 1926.

Prof. J. J. SEDERHOLM gave an account of orbicular granites and Rapakivi structure.

Meeting November 10th 1927.

12 persons present.

Mr. D. MALMQUIST spoke of minerals resembling amphodelithe and muscovite metamorphose of anorthites. (See this Bulletin. Vol. XXII.)

Mr. P. THORSLUND reviewed: R. Richter, Ein devonischer Pfeifenquartzit verglichen mit der heutigen »Sandkoralle». (See Senckenbergiana 2, Frankfurt a. M. 1920.)

Meeting November 20th 1927.

10 persons present.

Doc. G. TROEDSSON read a paper on Cretaceous areas in North Scania.

Meeting December 7th 1927.

Doc. H. W:SON AHLMANN gave a lecture on the morphology and changes of level of North Sahara. (Published in Geografiska Annaler, Årg. X; Heft 1 & 2. Stockholm 1928.)
